EDUCATION

University of Washington

Seattle, WA

B.S. Computer Science & B.A. Mathematics | GPA: 3.93 | USACO Gold & AIME Qualifier

June 2027

Coursework: Data Structures, Algorithms, Artificial Intelligence, Linear Optimization, Machine Learning, Software Development, Computer Vision, Systems Programming, NLP, Discrete Math, Probability Theory

EXPERIENCE

OpenAI

Sep 2026 – Dec 2026

Member of Technical Staff Intern

Bellevue, WA

- Ads and Monetization Engineering

Meta

July 2026 – Sept 2026

Software Engineer Intern

Menlo Park, CA

- Launched a message throughput **auto-update system** for **70k+ daily active** WhatsApp Business accounts
- Saved **2.03M in messages-per-second capacity** by automating rate-limit downgrades for dormant accounts
- **Reconstructed** WhatsApp business **rate-limiting infrastructure** to deprecate phone numbers for usernames
- Reduced customer-affecting invalid account states by **94%** with idempotent operations and race-condition fixes

Ai2 & UW RAINV Lab

Jan 2026 – June 2026

Research Assistant

Seattle, WA

- Designed **agentic LLM + SAM frameworks** for **MolmoHealth**, a VLM for visual medical position-reasoning
- Built **large-scale** real & synthetic data pipelines to process over **20 million** vision dataset samples for training
- Trained and evaluated multiple **YOLO & SAM** supporting models to achieve **>95% IoU** on novel research tasks

Amazon Web Services (AWS)

June 2025 – Sept 2025

Software Development Engineer Intern

Seattle, WA

- Created a modular and extensible system design for **Amazon Connect's first agentic AI** flow editor assistant
- Shipped **12k+** LOC of MCP tools for **autonomous UI control** and secure context-retrieval with user credentials
- Achieved **95%+** code coverage with unit tests and **E2E** functionality verified by comprehensive integration tests

Makeability Lab

June 2024 – Mar 2025

Research Assistant

Seattle, WA

- Developed an accessible iOS app using **SwiftUI**, GPT-4o multimodal capabilities, and voice transcription models
- Deployed app in studies with real mixed-vision-ability families and **coauthored paper** accepted by **ACM IUI**
- Surpassed the industry-leading application Be My AI by **30%** in usefulness and **5%** in perceived accuracy

PROJECTS

Sussi | Next.js, SwiftUI, MongoDB, Llama 4 API

June 2025

- Placed **1st** at Meta Llama 4 Seattle Hackathon, competing against **200+** top college and full-time competitors
- Developed an intelligent student laptop monitoring system with quick classroom insights and automation
- Built a Next.js teacher client and a SwiftUI MacOS student client that interface through MongoDB Atlas
- Gained pre-seed investor attention for startup potential and interviewed with Afore Capital

Triage | Next.js, Flask, HTML/CSS, Perplexity AI, SAM 2, REST API

October 2024

- Placed **1st** out of **1000+** participants at DubHacks '24, the largest hackathon in the Pacific Northwest
- Developed an AI disaster assessment and detection tool using satellite imagery to improve emergency response
- Built with Next.js frontend, Python Flask backend, Intel Tiber hosting, and AWS CloudFormationStack

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, TypeScript, HTML/CSS, Swift, SQL, Hack/PHP, x86-64 Assembly

Frameworks: Node.js, React.js, Next.js, Express.js, Flask, SwiftUI, Tailwind, Bazel, FastAPI, JUnit, Jest

Developer Tools: Git, Linux, Amazon Web Services, Google Cloud Platform, Slurm, Jupyter, Docker, TSLint

Concepts: Machine Learning, Object-Oriented Programming, Web Frameworks, Databases, Full stack, Cloud Computing, Cybersecurity, Parallel Programming, Statistics, Probability, NLP, REST API, HTTP, MCP
